

FINANCIAL STATEMENTS

Nine months ending December 31, 2018 and 2017
(Unaudited and Prepared by Management)

NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3(3) (a), if an auditor has not performed a review of the interim financial statements, the financial statements must be accompanied by a notice indicating that the statements have not been reviewed by an auditor. The accompanying unaudited interim financial statements of the Company have been prepared by and are the responsibility of the Company's management. The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by CPA Canada for a review of interim financial statements by an entity's auditor.

Frontier Lithium Inc.
Notes to Financial Statements
For Nine months ended December 31, 2018 and 2017 (Unaudited)

1. Nature of Operations and Going Concern

Nature of Operations

Frontier Lithium Inc. (the "Company" or "FL") was incorporated as 646215 Alberta Inc. by Certificate of Incorporation issued pursuant to the Business Corporations Act (Alberta) on March 13, 1995. The company was formerly called Houston Lake Mining Inc. The name of the Company was changed by Certificate of Amendment dated May 19, 2016.

The registered address of the Company is 2736 Belisle Drive, Val Caron, Ontario, P3N 1B3.

The Company is listed on the Toronto Venture Exchange ("TSX-V") under the symbol "FL".

The Company's principal activity is the acquisition, exploration and development of mining properties.

Going Concern

These financial statements, including comparatives, have been prepared using International Financial Reporting Standards ("IFRS") applicable to a going concern, which assumes continuity of operations and realization of assets and settlement of liabilities in the normal course of business for the foreseeable future, which is at least, but not limited to, one year from December 31, 2018. The Company is subject to risks and challenges similar to companies in a comparable stage of exploration and development.

As a result of these risks, there is significant doubt as to the appropriateness of the going concern assumption. There is no assurance that the Company's funding initiatives will continue to be successful and these financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary if the going concern assumption were inappropriate. These adjustments could be material. The Company will have to raise additional funds to advance its exploration and development efforts and, while it has been successful in doing so in the past, there can be no assurance that it will be able to do so in the future.

2. Critical Accounting Policies

(a) Basis of presentation and statement of compliance

These interim financial statements have been prepared in accordance with IAS 34 *Interim Financial Reporting* and do not include all of the information required for full annual financial statements by International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These interim financial statements should be read in conjunction with the Company's audited financial statements for the year ended March 31, 2018 which includes information necessary or useful to understanding the Company's business and financial statement presentation. In particular, the Company's significant accounting policies are presented as Note 2 in the audited financial statements for the year ended March 31, 2018 and have been consistently applied in the preparation of these interim financial statements.

The Company operates in one segment defined as the cash generating unit (CGU) which is Canada.

These board of directors approved these financial statements on February 27, 2019.

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis, except for financial instruments designated at fair value through profit and loss, which are stated at their fair value.

(c) Presentation and functional currency

The Company's presentation currency and functional currency is the Canadian dollar.

(d) Foreign currency translation

Monetary assets and liabilities denominated in a foreign currency are translated to Canadian dollars at exchange rates in effect at the statement of financial position date and non-monetary assets and liabilities are translated at rates of exchange in effect when the assets were acquired or obligations incurred.

Revenues and expenses are translated at rates in effect at the time of the transactions. Foreign exchange gains and losses are included in the Statement of Operations, Comprehensive Loss and Deficit, except for differences arising on the translation of equity instruments that are measured at fair value through other comprehensive income which are recorded in other accumulated comprehensive income.

(e) Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes party to a contractual agreement.

The company adopted IFRS 9 *Financial Statements* effective April 1, 2018. IFRS 9 sets out requirements for recognizing and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standard replaces IAS 39 *Financial Instruments: Recognition and Measurement*.

2. Critical Accounting Policies (continued)

(e) Financial instruments (continued)

IFRS 9 contains a new classification and measurement approach for financial assets that reflects the business model in which assets are managed and their cash flow characteristics. IFRS 9 contains three principal classification categories for financial assets: amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL). The standard eliminates the IAS 39 categories of held to maturity, loans and receivables and available for sale.

IFRS 9 largely retains the requirements of IAS 39 for the classification of financial liabilities.

The adoption of IFRS 9 has not had a significant effect on the Company's accounting policies for financial instruments.

Classification of Financial Assets

Financial assets are initially measured at fair value and classified into one of the following categories: amortized cost and fair value through profit or loss ("FVTPL"). Financial assets measured at amortized cost are initially recognized at fair value and subsequently are measured at amortized cost using an effective interest rate method. Financial assets measured at FVTPL are measured at fair value with unrealized gains and losses recognized in the Statement of Operations, Comprehensive Loss and Deficit.

Financial assets recognized in the statement of financial position include cash and cash equivalents, cash restricted for flow-through expenditures, HST receivable and other receivables and investments.

Cash and cash equivalents consist of cash on hand, bank balances, and investments in money market instruments in Canada with maturities of three months or less. Cash and cash equivalents are classified as fair value through profit or loss and are measured at fair value. Cash restricted for flow-through expenditures consists of bank balances and is measured at fair value.

HST receivable and other receivables are initially recognized at fair value and are subsequently measured at amortized cost using an effective interest rate method.

Investments reported at fair-value-through-profit-and-loss (FVTPL) are recorded at fair value with the difference between fair value and cost being recorded as unrealized gain or loss in value of investments on the Statement of Operations, Comprehensive Loss and Deficit.

Classification of Financial Liabilities

Financial liabilities are classified as either FVTPL or other financial liabilities. Financial liabilities classified as FVTPL are measured at fair value with unrealized gains and losses recognized in the Statement of Operations, Comprehensive Loss and Deficit unless the change in fair value is attributable to changes in credit risk in which case the change is reported in other comprehensive income. Other financial liabilities, including borrowings, are initially measured at fair value and subsequently measured at amortized cost using the effective interest rate method.

Financial liabilities consist of accounts payable and accrued liabilities. Accounts payable and accrued liabilities are initially recognized at fair value and classified as other financial liabilities, and subsequently measured at amortized cost.

2. Critical Accounting Policies (continued)

(e) Financial instruments (continued)

Measurement of Fair Value

All financial instruments that are measured at fair value are categorized into one of the three hierarchy levels, as described below, for disclosure purposes. Each level is based on the transparency of the inputs used to measure the fair values of assets and liabilities.

Level 1 – inputs are unadjusted quoted prices of identical instruments in active markets

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the comparable asset or liability, either directly or indirectly.

Level 3 – one or more significant inputs used in a valuation technique are unobservable in determining fair values of the instruments.

The fair value of financial instruments traded in active markets is based on quoted market prices at the date of the Statement of Financial Position (Level 1 input). The quoted market price used for financial assets held by the Company is the current bid price.

Transaction Costs

Transaction costs directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities recorded at fair value through profit or loss for the period are recognized immediately in the Statement of Operations, Comprehensive Loss and Deficit.

Offsetting

Financial assets and financial liabilities are offset and reported on the Statement of Financial Position only if there is an enforceable legal right to offset the recognized amounts, and an intention to realize the asset and settle the liability simultaneously.

Issuance of Equity Instruments

Equity instruments issued by the Company are recognized at the proceeds received, net of direct issuance costs.

Frontier Lithium Inc.
Notes to Financial Statements
For Nine months ended December 31, 2018 and 2017 (Unaudited)

2. Critical Accounting Policies (continued)

(e) Financial instruments (continued)

A comparison of the classifications of financial assets and financial liabilities before and after implementation of IFRS 9 is shown in the table below:

	IAS 39	IFRS 9
<i>Financial assets</i>		
Cash and cash equivalents	FVTPL	FVTPL
Investments	FVTPL	FVTPL
HST receivable and other receivables	loans and receivables	amortized cost
<i>Financial liabilities</i>		
Accounts payable and accrued liabilities	other financial liabilities	other financial liabilities

(f) Property, Plant and Equipment

On initial recognition, property, plant and equipment are recorded at cost, being the purchase price which includes the cash consideration and the fair market value of any shares issued.

Property, plant and equipment is subsequently measured at cost less accumulated depreciation, less any accumulated impairment losses, with the exception of land which is not depreciated. When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Statement of Operations, Comprehensive Loss and Deficit during the financial period in which they are incurred.

Frontier Lithium Inc.
Notes to Financial Statements
For Nine months ended December 31, 2018 and 2017 (Unaudited)

2. Critical Accounting Policies (continued)

(f) Property, Plant and Equipment (continued)

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount, and are recognized in the Statement of Operations, Comprehensive Loss and Deficit.

Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation based on the estimated useful life of the asset is calculated as follows:

Exploration equipment	- 30%	diminishing balance basis
Furniture and fixtures	- 20 %	diminishing balance basis
Vehicles	- 30 %	diminishing balance basis
Computer equipment	- 55/45/30%	diminishing balance basis
Computer software	- 20 %	diminishing balance basis

Property, plant and equipment that is acquired during the year is amortized at one-half of the stated rate.

(g) Leased assets

Where substantially all of the risks and rewards incidental to ownership of a leased asset have been transferred to the Company (a "finance lease"), the asset is treated as if it had been purchased outright. The amount initially recognized as an asset is the lesser of the fair value of the leased property and the present value of the minimum lease payments payable over the term of the lease. The corresponding lease commitment is shown as a liability.

Lease payments are split between interest and capital. The interest element is charged to the Statement of Operations, Comprehensive Loss and Deficit over the period of the lease and is calculated so that it represents a constant proportion of the lease liability. The capital element reduces the balance owed to the lessor.

Where substantially all of the risks and rewards incidental to ownership are not transferred to the Company (an "operating lease"), the total rentals payable under the lease are charged to the Statement of Operations, Comprehensive Loss and Deficit on a straight-line basis over the lease term. The aggregate benefit of lease incentives is recognized as a reduction of the rental expense over the lease term on a straight-line basis.

2. Critical Accounting Policies (continued)

(h) Exploration and evaluation assets

Exploration assets

Exploration expenditures relating to resource properties in which a legal right to explore has been obtained and an interest is retained are deferred and are carried as an asset until the results of the projects are known. If a project is unsuccessful or if exploration has ceased because continuation is not economically feasible, the cost of the property is written off. The fair value of resource properties acquired in exchange for the issuance of the Company's shares is determined using the closing price of the Company's shares on the date the shares are issued.

Option payments paid by the Company are capitalized to resource property costs when paid. Option payments received by the Company are deducted from resource property costs when received. No gain or loss on disposition of a partial interest is recorded until all carrying costs of the interest have been offset by option payments received.

Evaluation assets

Evaluation expenditures relating to the evaluation of a resource property are capitalized until the property is brought into production, abandoned or sold. Expenditures relating to a resource property that is brought into production are amortized on a unit-of-production basis over estimated recoverable reserves.

If a project is successful and production commences, the exploration expenditures and related deferred evaluation expenditures are amortized by charges against income from future mining operations.

Exploration and evaluation expenditures, which are general in nature and cannot be associated with a specific group of mining claims, and general administrative expenses, are expensed in the year incurred.

(i) General

Administrative, prospecting and general expenses are expensed in the year in which they are incurred.

(j) Income Taxes

Income taxes are calculated using the asset and liability method. Under this method deferred income tax assets and liabilities are recognized for timing differences between the tax and accounting basis of assets and liabilities, and for the recognition of accumulated capital and non-capital losses, which in the opinion of management are more likely than not to be realized before expiry. Deferred tax assets and liabilities are presented as a non-current item and measured at the tax rates that are expected to be in effect in the period when the asset is expected to be realized or the liability is expected to be settled, based on the tax rates that have been enacted or substantially enacted by the end of the reporting period. The effect on deferred income tax assets and liabilities resulting from a change in enacted or substantially enacted tax rates is included in income in the period in which the change is enacted or substantively enacted.

2. Critical Accounting Policies (continued)

(k) Flow-Through Shares

The Company will, from time to time, issue flow-through shares to finance a portion of its exploration programs. Pursuant to the terms of flow-through share agreements, the Company agrees to incur qualifying expenditures and renounce the tax deductions associated with these qualifying expenditures to the flow-through subscribers at an agreed upon date.

Flow-through shares are reported at issue price. If the flow-through shares are issued at a premium to the market price of non-flow through or hard dollar shares at the date of announcement, such premium or excess proceeds is reported as a liability on the Statement of Financial Position. When the related expenditures are incurred, and the tax deductions are renounced to the unit holders, the Company reverses the related deferred tax liability on the Statement of Financial Position and reduces the deferred tax expense on the Statement of Operations, Comprehensive Loss and Deficit.

(l) Provisions

Rehabilitation provision

The Company is subject to various government laws and regulations relating to environmental disturbances caused by exploration and evaluation activities. The Company records the present value of the estimated costs of legal and constructive obligations required to restore the exploration sites in the period in which the obligation is incurred. The nature of the rehabilitation activities includes restoration, reclamation and re-vegetation of the affected exploration sites.

The rehabilitation provision generally arises when the environmental disturbance is subject to government laws and regulations. When the liability is recognized, the present value of the estimated cost is capitalized by increasing the carrying amount of the related mining assets. Over time, the discounted liability is increased for the changes in present value based on current market discount rates and liability specific risks. Additional environmental disturbances or changes in rehabilitation costs will be recognized as additions to the corresponding assets and rehabilitation liability in the year in which they occur.

The Company did not have a rehabilitation provision at December 31, 2018 or March 31, 2018.

Other provisions

Provisions are recognized for liabilities of uncertain timing or amount that arose from past transactions, including legal or constructive obligations. The provision is measured at the best estimate of the expenditure required to settle the obligation at the reporting date. If the Company is virtually certain that some or all of a provision will be reimbursed, for example under an insurance contract, such reimbursement is recognized as a separate asset. Provisions may be discounted using a current pre-tax rate that reflects the risks specific to the liability. The expense relating to any provision is presented in the Statement of Operations, Comprehensive Loss and Deficit.

2. Critical Accounting Policies (continued)

(m) Share capital

Financial instruments issued by the Company are defined as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares and warrants are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares, stock options or warrants are shown in equity as a deduction, net of tax, from the proceeds.

(n) Use of Estimates

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustments to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed next.

Rehabilitation provisions

Rehabilitation provisions are based on internal estimates. Assumptions, based on the current economic environment, are made which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from period to period. Actual rehabilitation costs will ultimately depend on future market prices for the rehabilitation costs which will reflect the market condition at the time the rehabilitation costs are actually incurred. The final cost of the recognized provisions may be higher or lower than currently provided for.

The company had no rehabilitation provision at December 31, 2018 and March 31, 2018.

Exploration and evaluation assets

The application of the Company's accounting policy for exploration and evaluation assets requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after an expenditure is capitalized, information becomes available suggesting that the recovery of the expenditure is unlikely, the amount capitalized is written off in the period the new information becomes available.

2. Critical Accounting Policies (continued)

(n) Use of Estimates (continued)

Title to mineral property interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

Income taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. Management believes they have adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent there are sufficient taxable temporary differences (deferred tax liabilities) relating to the same taxation authority and the same taxable entity against which the unused tax losses can be utilized. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

Share-based payment transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them. The Company uses the Black-Scholes model to value stock options.

(o) Stock Based Payments

Where equity-settled stock options are awarded to employees, the fair value of the stock options at the date of grant is charged to the Statement of Operations, Comprehensive Loss and Deficit over the vesting period. Performance vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at each reporting date so that, ultimately, the cumulative amount recognized over the vesting period is based on the number of options that eventually vest. Non-vesting conditions and market vesting conditions are factored into the fair value of the options granted. As long as all other vesting conditions are satisfied, a charge is made irrespective of whether these vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition or where a non-vesting condition is not satisfied.

2. Critical Accounting Policies (continued)

(o) Stock Based Payments (continued)

Where the terms and conditions of options are modified before they vest, the increase in the fair value of the options, measured immediately before and after the modification, is also charged to the Statement of Operations, Comprehensive Loss and Deficit over the remaining vesting period. Where equity instruments are granted to employees, they are recorded at the fair value of the equity instrument granted at the grant date. The grant date fair value is recognized in comprehensive loss over the vesting period, described as the period during which all the vesting conditions are to be satisfied.

When equity instruments are granted to non-employees, they are recorded at the fair value of the goods or services received in comprehensive loss, unless they are related to the issuance of shares. Amounts related to the issuance of shares are recorded as a reduction of share capital. When the value of goods or services received in exchange for the stock-based payment cannot be reliably estimated, the fair value is measured by use of a valuation model. The expected life used in the model is adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioral considerations. All equity-settled stock-based payments are reflected in contributed surplus, until exercised. Upon exercise, shares are issued from treasury and the amount reflected in contributed surplus is credited to share capital, adjusted for any consideration paid.

The Company values stock options using the Black-Scholes model.

(p) Income Recognition

Income from the sale of mineral products is recorded on a gross basis when title passes to an external party. The Company recognizes income when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collection of the related receivable is reasonably assured. Title and risk of loss generally pass to the customer at the time of delivery of the product.

(q) Comprehensive Income

Comprehensive income is the change in equity of the Company during a reporting period from transactions and other events and circumstances from non-owner sources. It includes all changes to equity during a period except those resulting from investments by owners and distributions to owners. Comprehensive income is comprised of net income for the period and other comprehensive income. This standard requires certain gains and losses that would otherwise be recorded as part of net earnings to be presented in "other comprehensive income" until it is considered appropriate to recognize in net earnings.

The Company had no comprehensive income or loss transactions, other than its net loss, presented in the Statement of Operations, Comprehensive Loss and Deficit, nor has the Company accumulated other comprehensive income during the reporting periods.

2. Critical Accounting Policies (continued)

(r) Loss Per Share

Basic loss per share is computed by dividing comprehensive loss available to common shareholders by the weighted average number of common shares outstanding during the period. The computation of diluted loss per share assumes the conversion, exercise or contingent issuance of securities only when such conversion, exercise or issuance would have a dilutive effect on earnings per share. The dilutive effect of convertible securities is reflected in diluted earnings per share by application of the "if converted" method. The dilutive effect of outstanding options and warrants and their equivalents is reflected in diluted earnings per share by application of the treasury stock method.

(s) Impairment

Financial assets

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

A previously recognized impairment loss may be reversed, to the extent of previously recorded losses, if the asset subsequently recovers.

Non-financial assets

Impairment tests on intangible assets with indefinite useful economic lives are undertaken annually at the financial year-end. Other non-financial assets are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Indicators of impairment include a significant decrease in market price, evidence of obsolescence and physical damage and significant decrease in use.

Where the carrying value of an asset exceeds its recoverable amount, which is the greater of value in use and fair value less disposal costs, the asset is written down to recoverable amount and the impairment loss is recognized in the Statement of Operations, Comprehensive Loss and Deficit.

Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the asset's cash-generating unit, which is the smallest group of assets in which the asset belongs for which there are separately identifiable cash inflows that are largely independent of the cash inflows from other assets.

A previously recognized impairment loss may be reversed only if there has been a change in the estimates used to determine the recoverable amount of the asset. If this is the case, the carrying amount of the asset is increased to its recoverable amount and is recognized in the Statement of Operations, Comprehensive Loss and Deficit. The increased amount cannot exceed the carrying amount that would have been determined had no impairment been recognized for the asset.

Frontier Lithium Inc.
Notes to Financial Statements
For Nine months ended December 31, 2018 and 2017 (Unaudited)

3. Investments – FVTPL

The Company holds securities that have been designated as fair value through profit or loss (FVTPL) as follows:

	Dec 31, 2018		March 31, 2018	
	Market Value	Cost	Market Value	Cost
Long-term:				
Common shares in public Company	\$ 76,750	\$ 625,726	\$ 124,286	\$ 625,726

Market value is based on the quoted closing bid price of the securities at December 31, 2018, and March 31, 2018. The fair value of these securities may differ from the quoted trading price due to the effect of market fluctuations and adjustment for quantities traded.

4. Exploration and Evaluation Assets

(a) Dogpaw Lake Property – Kenora, Ontario

The Dogpaw Lake Gold Property is located adjacent to the Company's former West Cedartree Property. In January 2013, the Company sold its interest in this property to an arm's length purchaser (see Note 4g).

(b) West Cedartree Property – Kenora, Ontario

The West Cedartree Gold Property is located in the Cedartree Lake area within the Kenora Mining District of Ontario, Canada. The property consists of four (4) parts: the Jesse (North) Property, the West Cedartree Property, the McLennan Property and the Dogpaw West and Gold Sun Properties. All four are contiguous and considered as one property for exploration purposes.

Jesse (North) Property

The Company held a 100% interest in the Jesse (North) Property. In January 2013, the Company sold its interest in this property to an arm's length purchaser (see Note 4g).

West Cedartree Property

The Company held a 100% interest in the West Cedartree Property. In January 2013, the Company sold its interest in this property to an arm's length purchaser (see Note 4g). The Company holds a net smelter royalty (NSR) of 2.5% of net smelter returns from this property.

McLennan Property

The Company held a 100% interest in the McLennan Property. In January 2013, the Company sold its interest in this property to an arm's length purchaser (see Note 4g).

Dogpaw West and Gold Sun Properties

The Company held a 100% interest in the Dogpaw West and the Gold Sun properties. In January 2013, the Company sold its interest in this property to an arm's length purchaser (see Note 4g).

(c) North Block – Kenora, Ontario

The Company held a 100% interest in North Block Gold Property in the Cedartree Lake area within the Kenora Mining District of Ontario, Canada. In January 2013, the Company sold its interest in this property to an arm's length purchaser (see Note 4g).

(d) Tib Lake - Thunder Bay, Ontario

The Company held a 100% interest in the Tib Lake PGM Property located in the Thunder Bay Mining District of Ontario. In May of 2012, the Company optioned the property (see Note 4g).

4. Exploration and Evaluation Properties (Continued)

(e) Pakeagama Lake – Red Lake, Ontario

Pakeagama Lake Property

The Company has a 100% interest in the Pakeagama Lake Property. The 100% ownership interest is subject to a 2.5% NSR subject to a 1.0% buyout provision.

Pakeagama Lake Southeast Property

The Company has a 100% interest in the Pakeagama Lake Southeast Property. The 100% ownership interest is subject to a 2.5% NSR subject to a 1.0% buyout provision. The Company will issue 100,000 common shares and pay \$35,000 in the current fiscal year to earn a 100 percent interest from the two individuals.

The Company entered into an exploration agreement with three First Nations and has committed to make certain payments (see Note 9).

(f) Dubenski Property – Kenora, Ontario

The Company had a 100% option interest in Dubenski Gold Property. The property is located adjacent the West Cedartree properties in the Kenora Mining District of Ontario. In January 2013, the Company sold its interest in this property to an arm's length purchaser (see Note 4g).

(g) Optioning and Sale of Properties

In May of 2012, the Company optioned the Tib Lake property to an arm's length party. The optionee is required to spend \$1,600,000 on mineral exploration prior to exercising the option. Once the option is exercised, the Company will maintain a 2.5% net smelter royalty on certain mining claims. The purchaser has the option to buy back 1% of the net smelter royalty for \$1,000,000.

A summary of the required cash payments is as follows:

Cash Payments	Due Date
\$ 40,000	signing of Letter of Intent (received)
50,000	six month anniversary of signing of LOI (received)
50,000	first anniversary of signing of LOI (received)
60,000	second anniversary of signing of LOI (received)
100,000	third anniversary of signing of LOI (received)
150,000	fourth anniversary of signing of LOI (received)
<u>\$ 450,000</u>	

4. Exploration and Evaluation Properties (Continued)

(g) Optioning and Sale of Properties (continued)

In January of 2013, the Company optioned the following properties to an arm's length party: Dogpaw Lake, West Cedartree (Jesse, West Cedartree, McLennan, Dogpaw West and Gold Sun), North Block, and Dubenski.

The company received proceeds of \$100,000 at the time the Letter of Intent was signed, \$400,000 cash when the Asset Purchase Agreement was signed, plus 1,935,000 common shares of Coventry Resources Inc. (TSX.V: CYY) worth \$716,000 at the time the Asset Purchase Agreement was signed.

The Company maintains a 2.5% net smelter royalty (NSR) on net smelter returns from the West Cedartree property.

6. Related Party Balances and Transactions

During the Nine months ended December 31, 2018 and 2017, the Company incurred the following expenditures with related parties:

	Dec 31,2018 (Unaudited)	Dec 31,2017 (Unaudited)
Office and equipment rental ¹	\$ 6,750	\$ 6,750
Consulting ²	187,000	187,000
Investment in exploration and evaluation assets ³	-	87,600
Investment in exploration and evaluation assets ¹	-	65,475

¹ paid to company controlled by a corporate director

² paid to corporate officers

³ paid to company controlled by corporate officer

During the period, the company issued 261,979 shares to settle \$104,792 of debt owing a company controlled by a director. The company incurred a loss of \$27,717 on debt extinguishment.

The company issued 1,339,375 stock options to company directors and officers. These options were valued at \$407,558 using the Black Scholes model (see Note 7).

Included in accounts payable is \$76,733 owing to a corporation controlled by a director of the company.

The transactions above are in the normal course of operation and are measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

7. Share Capital

(a) Authorized:

- Unlimited number of common voting shares without nominal or par value
- Unlimited number of first preferred shares
- Unlimited number of second preferred shares

The First and Second Preferred Shares may be issued in one or more series. The Directors are authorized to fix the number of shares in each series and to determine the designation, rights, privileges, restrictions, and conditions attached to the shares of each series.

Balance at December 31, 2018	<u>151,669,397</u>	<u>\$ 27,257,771</u>

- (a) In April 2018, the company issued 261,979 shares of the company to one non-arm's length party to settle \$104,792 of debt. The company incurred a loss on extinguishment of \$27,717.
- (b) In April 2018, 850,000 options were exercised to buy 850,000 common shares of the company for \$123,250 (\$0.145 each).
- (c) In April 2018, 39,375 options were exercised to buy 39,375 common shares of the company for \$15,750 (\$0.40 each).
- (d) In June 2018, the company completed a non-brokered private placement financing. The company issued 5,880,969 units at \$0.40 per unit for total gross proceeds of \$2,352,388. Each unit consisted of one common share and one share purchase warrant, each warrant exercisable at \$0.60 for twenty-four months. The fair value attributed to the 5,880,969 share purchase warrants was estimated to be \$566,000 using the Black-Scholes pricing model.

The company issued 117,900 common shares to a broker as a finder fee valued at \$47,160. In addition, the company issued 117,900 warrants valued at \$16,810 using the Black-Scholes pricing model. The company also issued 27,000 warrants to two other parties valued at \$3,850 in connection with the financing.

The assumptions used in the Black-Scholes model are as follows: risk free rate 1.04% and volatility 73.274%.

- (e) In September 2018, the company completed a non-brokered private placement financing. The company issued 1,466,182 units at \$0.44 per unit for total gross proceeds of \$645,120. Each unit consisted of one flow-through common share and one half of one share purchase warrant, each warrant exercisable at \$0.55 for twenty-four months. The fair value attributed to the 733,091 share purchase warrants is estimated to be \$90,100 using the Black-Scholes option pricing model.

The assumptions used in the Black-Scholes model are as follows: risk free rate 1.38% to 1.40% and volatility 71.182%.

8. Income Taxes (continued)

The Company's effective tax rate, which differs from the combined federal and provincial statutory rate of 26.5%, is reconciled as follows:

Nine months ending	Dec 31, 2018	Dec 31, 2017
Loss before income tax	\$ (1,001,539)	\$ (1,689,022)
Income tax recovery @ 26.5%	(399,843)	(447,591)
Unrealized gain on investments - FVTPL	11,020	(46,095)
Loss on extinguishment of debt	7,345	19,668
Share compensation	108,003	306,609
Other	5,032	6,922
Valuation allowance	268,443	160,487
	<hr/>	<hr/>
Actual income tax expense (recovery)	\$ -	\$ -

9. Commitments

The company entered into exploration agreements with three First Nations. The company has committed to pay them a total of 3.09% of exploration expenses and to compensate them for proven loss of revenue resulting from disruption of certain traditional activities. All amounts due have been accrued.

11. Capital Management

The Company manages capital, based on its cash and equivalents and ongoing working capital, with an objective of safeguarding the Company's ability to continue as a going concern, maximizing the funds invested into exploration and development activities, exploring and developing mineral resources, and considering additional financings which minimize shareholder dilution. There were no changes in the Company's approach to capital management during the period ended December 31, 2018.

The Company's capital structure reflects a company focused on mineral exploration and financing both internal and external growth opportunities. The exploration for and development of mineral deposits involves significant risk which even a combination of careful evaluation, experience and knowledge may not adequately mitigate.

The Company manages capital in proportion to risk and manages the mineral properties and capital structure based on economic conditions and prevailing commodity pricing and trends. The Company relies on equity financings to maintain adequate liquidity to support its ongoing exploration and development activities and ongoing working capital commitments.

12. Financial Risk Factors

The Company may be exposed to risks of varying degrees of significance which could affect its ability to achieve its strategic objectives. The main objective of the Company's risk management process is to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. The principal risks to which the Company is exposed are described below:

Credit Risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and cash equivalents and accounts receivable. Cash and cash equivalents consists of cash on hand deposited with reputable financial institutions which is closely monitored by management. Accounts receivable includes HST receivable and is subject to CRA's assessment prior to receipt. Management believes credit risk with respect to cash and cash equivalents and accounts receivable is low.

Liquidity Risk

The Company ensures that there is sufficient cash and other short-term assets readily convertible into cash in order to meet its liabilities when they come due. The Company's cash is held in business accounts with a Canadian bank. Management believes that liquidity risk is low.

Fair Value

The carrying value of cash and cash equivalents, HST receivable and other receivables, and accounts payable and accrued liabilities approximate their fair value due to the relatively short periods to maturity of these instruments.

All financial instruments that are measured at fair value are categorized into one of three hierarchy levels, as described below, for disclosure purposes. Each level is based on the transparency of the inputs used to measure the fair values of assets and liabilities.

- Level 1 - inputs are unadjusted quoted prices of identical instruments in active markets
- Level 2 - inputs other than quoted prices included in Level 1 that are observable for a comparable asset or liability, either directly or indirectly.
- Level 3 - one or more significant inputs used in a valuation technique are unobservable in determining fair values of the instruments

The Corporation's only instruments that are carried at fair value are cash and cash equivalents and investments - FVTPL each of which is considered Level 1 in the hierarchy.

Interest Rate Risk

The Company's cash is held in business accounts with nominal interest rates. Management considers interest rate risk to be low.

Currency Risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company retains a US Bank Account with a nominal balance. Management considers currency risk to be low.

12. Financial Risk Factors

Commodity Price Risk

Commodity prices fluctuate and are affected by factors outside of the Company's control. The current and expected future spot prices have a significant impact on the market sentiment for investment in exploration companies and may impact the Company's ability to raise equity financing for its ongoing working capital requirements. The Company closely monitors commodity prices to determine the appropriate course of action to be taken.

Sensitivity Analysis

Based on management's knowledge and experience of the financial markets, the Company believes that a 10% movement in interest rates and foreign exchange rates that may reasonably be expected to occur over the next twelve-month period will not have a significant impact on the Company.
